Dear FCC:

I am a wireless phone user only for safety and security. I never even use my ten minutes a month. However it does provide me with a sense of keeping in touch if there is an emergency. I live in an area with snowy winters, often driving in less than ideal conditions. Please allow me to continue having this feeling of security at an affordable rate.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,
